SUMMARY

Graduated Full-Stack Web Developer at Southern Methodist University with a 4.0 GPA. Having owned a restaurant for over 17 years, acquired experience in public relations, finances, advertising, and training. While running a restaurant also freelanced as a Graphic Designer, designing advertising materials for various businesses. Known as a creative, is also adaptable, disciplined, and loves a challenge. Proficiency in HTML, CSS, React, jQuery, and studying across the full technical stack. Excited to keep learning and looking and forward to solving problems since I can think out of the box.

Transferable Skills: Flexible, Motivated, Organized, Avid learner, Yoga enthusiast, Seasonal cyclist, and Troubleshooter

PROJECTS

CHIEF System | https://github.com/rgarza28/Inventory-Manager | https://lit-meadow-59526.herokuapp.com
- Inventory Management System, to help businesses to have a broad view of inventory at all times and alerts when a certain item is low in stock, decreasing the time of orders fulfillment by 50%.
- Teamed with 3 other students to write and develop this Inventory Management System.
- Led the execution of the Front End Development, User Interface, and User Experience Designs.
- Mobile responsive, developed with React, and used Material UI Framework, plus specific CSS3 styling.

Employee Directory | https://github.com/vjeuel/employee_directory | https://tinyurl.com/yxl92mfb
- Ability to search employees from the database, and also sort the table by name, phone number, and email.
- The columns contain 5 elements: employee photo, full name, phone number, email, and date of birth. Useful for companies to sort a long list of employees to find a specific person.
- Mobile responsive, built with React, pulling data from JSON, and styled with CSS3.

Fitness Tracker | https://github.com/vjeuel/Fitness_Tracker | https://tinyurl.com/y53rudyy
- Created to motivate users to be more active by tracking workouts, either cardio or weight lifting.
- This app uses asynchronous operations to get information from the database and post and update to add and make changes to entries in the database.
- Mobile responsive, implemented with HTML5, CSS3 using MongoDB for database, Node.js, and deployed on Heroku.

Budget Tracker | https://github.com/vjeuel/Budget-Tracker | https://tinyurl.com/y57azweq
- Set out to keep track of a budget, where the user can add and subtract funds, and the balance fluctuates accordingly.

- Mobile responsive, conceived with HTML5, CSS3 using MongoDB for database, Node.js, and deployed on Heroku.

Hungry at Home | https://github.com/vjeuel/food_api_app | https://vjeuel.github.io/food_api_app/
- For people who are at home in a Covid-19 lockdown, to give access to meals and drinks recipes and also to stay connected with news related to the virus.
- Partnered with 2 other students to work from the ground up on the development of this website.
- Created the design, using CSS3's Media Query in conjunction with the Materialize framework, and also facilitated the API's connections.
- Mobile responsive, written with HTML5, CSS3, Materialize Framework, CSS, and Javascript.

Restaurant Website | https://github.com/vjeuel/tonys-pizza | https://tinyurl.com/ychxobt3
Restaurant Website | https://github.com/vjeuel/carmines-pizzeria-grid | https://tinyurl.com/y9r7hthm
- 2 Restaurant's static websites are designed to present menus, specials, and contact information.
- Connected both sites to online ordering and had a sales boost of 25% and 32% in revenue respectively.

Weather|APP | https://github.com/vjeuel/weather_app | https://vjeuel.github.io/weather_app/
- A responsive website offers weather information and 5 days forecast, a particular feature is depending on the weather, the background changes accordingly to the weather condition.
- Mobile responsive and written using HTML5, CSS3, Javascript, and jQuery.
